Yufeng Pang

EDUCATION

BSc Applied Mathematics at Xi'an Jiaotong-Liverpool University Sept. 2020 – Jul. 2025

Key modules: Calculus, Linear Algebra, Analysis, Abstract Algebra, Differential Equations, Metric Spaces, Discrete Mathematics, Numerical Analysis

MSc Data Science at Lingnan University Sept. 2025 – Jul. 2026

Key modules: Python Programming, Data mining, Database Management, Data Visualization, Computer Vision, Machine learning

RESEARCH PROJECTS

Data Server Energy Consumption Analysis Sep. 2025 – Nov. 2025

- Conducted large-scale exploratory data mining on ESPOL dataset (399,998 instances, 19 attributes) to uncover patterns in server energy consumption.
- Applied data preprocessing techniques including normalization, feature selection, and dimensionality reduction to improve model robustness. Implemented classification algorithms (logistic regression, decision trees) and performed cross-validation to ensure generalizability.
- Achieved 85% predictive accuracy with logistic regression, demonstrating effective feature engineering and model tuning.
- Collaborated with teammates to design interactive visualizations using clustering and correlation analysis, highlighting key drivers of energy efficiency.

WORK EXPERIENCE

China Education Technology Co., Ltd. Jul. 2023 - Oct. 2023

Data Analyst Intern – Visualization and Dashboard Development

- Contributed to requirement analysis and modular design for data governance projects.
- Assisted in writing analytical reports and optimizing visualization interfaces.
- Engaged in client needs assessment and product deployment processes, enhancing cross-functional collaboration and problem-solving skills.

China Asset Technology Co., Ltd. Jun. 2025 - Aug. 2025

Internship – Testing and Operations

- Maintained client ledgers and built dashboards to visualize tenant data.
- Performed stress testing on Asset Management System using JMeter and Nmap.
- Supported vulnerability assessments and documented findings in detailed error reports.

ADDITIONAL INFORMATION

Technical Skills

Programming & Tools: Python, Java, MATLAB, RStudio, LaTeX

Data & Visualization: Tableau, MySQL, Weka

Testing & Security: JMeter, Nmap

Research Interest

Strong interest in computer vision and data mining, particularly in applying machine learning techniques to anomaly detection, image recognition, and large-scale visual data analysis.
